Directional Spool Valve  
Sub-plate Mounted  
Type DE10, Series 10

Data Sheet  
D-1002/06.99  
GB

### Features

- ◇ Direct operated directional spool valve with solenoid operation.
- ◇ High durability.
- ◇ Various options.
- ◇ Oil immersed type valve with no oil leakage from solenoid pin.
- ◇ Porting pattern to DIN 24 340 form A ISO 4401 and CETOP-RP 121H.
- ◇ Wet pin AC & DC solenoids with removable coil.
- ◇ Individual electrical connection and central connections.
- ◇ Manual override (standard).
- ◇ Solenoid coil can be rotated through 90°.
- ◇ Coils can be replaced without releasing any fluid.

Valve DE10

### Functional Description

Type DE10 Directional Spool Valves are solenoid operated directional spool valves that are used to control (start, stop and direction) fluid flow.

The valves basically comprise a housing (1), one or two solenoids (2), a control spool (3), and two springs (4).

When de-energised, the control spool (3) is held by the return springs (4) in a central or in the initial position (except for detented spools). The control spool (3) is actuated via wet pin solenoids (2).

**Note:** The pressure chamber must be filled with oil to ensure trouble free operation.

The force of the solenoid (2) acts on the plunger (5) causing the control spool (3) to move from its rest position to its desired end position. Thus, the required flow pattern from P to A and B to T or P to B, and A to T is selected.

A manual override (6), (standard), is provided for emergency operation of the control spool (3) without energising the solenoid.

**Type DE 10..20 - 0\*\*** (only with spool type 001, 003 and 004) - directional valve with 2 switching positions and 2 solenoids without detent, and no defined switching position in the de-energised condition.

**Type DE 10..20 - 1\*\*** (detent spool only with spools type 101, 103 and 104) - directional valve with 2 switching positions, 2 solenoids and a detent. Relevant switching positions are fixed and continuous solenoid energization is not necessary.

**Throttle Inserts** (type DE10..20..-P) - throttle inserts are required, if, due to the operating conditions, flows are expected to be higher than the stated maximum performance limits of the valve. Throttle inserts are inserted in the P channel of the directional valve.

**Ordering Code – Directional Spool Valve, Direct Operated**

DE 10 P 10 1 04 W D 24 AL PO8 V

**Directional Valve,  
Solenoid Operated**

**Size**  
10

**Type of Mounting**  
P: Sub-plate Mounting

**Series Number**  
10

**Spool Return**  
0: 2-position without Spring Return  
1: 2-position without Spring Return with detent  
2: 2-position with Spring Return  
**OR**  
3-position with Spring Return

**Spool Types**  
See spool symbols

**Solenoid Type**  
W: Wet pin solenoids (with manual overrides)

**Electrical supply**  
A: Alternating current (AC)  
D: Direct current (DC)  
R: Independent of frequency with built-in rectifier for AC

**Voltage**  
12: 12V  
24: 24V  
120: 120V  
240: 240V

**Suitable Oil**  
No Code: Mineral Oil, Fatty Acid Ester, Water Glycol  
V: Phosphate Ester

**Plug-in Throttle in P Port**  
No code No plug-in throttle  
P08: Ø0.8 mm  
P10: Ø1.0 mm  
P12: Ø1.2 mm  
P15: Ø0.8 mm  
P20: Ø2.0 mm  
P25: Ø0.8 mm  
P30: Ø3.0 mm  
P40: Ø4.0 mm

**Electrical Connections**

**Technical Data (continued)****Electrical**

Type of Voltage	DC	AC
Available Voltages	12, 24	120, 240 (50/60Hz)
Voltage Tolerance (nominal voltage)	±10%	±10% (50Hz); ±20% (60Hz)
Power Consumption	38 W	-
Holding current	-	90 VA
Startup current	-	540 VA
Duty Cycle	100%	100%
Switching Time	ON: 95 mS OFF: 30 mS	ON: 25 mS OFF: 20 mS
Switching Frequency	Up to 14,400 cycles/hour	Up to 14,400 cycles/hour
Insulation to DIN 40 050	IP65	IP65
Coil Temperature	Up to 180°C	Up to 180°C

Note: With electrical connections the earth (PE) must be correctly connected.

**Switching Data for AC solenoid Valve**

Note: The maximum flow VS frequency and voltage in the tables are as follows:

Independent of frequency and voltage →	63	63	← 50Hz, nominal voltage
		(25)	← 50 Hz, 80% of nominal voltage
		58	← 60Hz, nominal voltage
		(20)	← 60Hz, 90% of nominal voltage

**Three Position valves**

Valve wiring details

- Note:
- \*1. Either earth terminal can be used.
  - \*2. When common plate is unnecessary (4 wires for 3 solenoids), it can be removed.
  - \*3. No polarity in DC solenoid.

**Characteristic Curves**

Measured at  $v = 36\text{cSt}$  and  $t = 50^\circ\text{C}$
